

# CARSTACKER

Easy Living creating more car parking space.

With population and the number of cars on the road on the rise, combined with smaller blocks of land in residential areas. Easy Living Home Elevators offer space saving car parking solutions to double your available parking space for both residential and commercial applications, by providing a car stacker system.

Easy Living Home Elevators can double existing parking spaces for: Residential homes, apartments, public and commercial parking areas, offices, hotels, car collectors, car rentals and dealers.

From a design point of view, the Easy Living Car Stacker is very easily incorporated into new and existing projects without any site building works required for fast installation and is suitable for both indoor and outdoor installations.

Where there is a large parking requirement these lifts can be positioned next to each other for maximum space utilisation.

*The Easy Living Car Stacker is a safe, user friendly and low-cost parking solution that adds value to your project.*

## WHY INSTALL A CAR STACKER?

### Advantages of an Easy Living Car Stacker include:

- The creation of additional on-site parking.
- An allowance for visitors parking.
- An ideal solution where the council requires a minimum parking space provision for both commercial and residential projects.
- A perfect solution for development space shortages.
- Multiple units can be positioned together in commercial applications for maximum space utilisation.
- By utilising the air above you increase your property value.
- Increased Security - If a vehicle is parked in the street it is prone to theft, vandalism and hail damage.
