Hyde Apartments, Sydney

When only the best will do!

Easy Living Home Elevators has been Australian owned and operated since 1998, and during this time has grown steadily. Today in our 13th year we have over 100 employees and going up!

Easy Living Home Elevators has achieved an outstanding reputation with almost 5000 lifts in our maintenance system around Australia, mostly in private residential homes.

Our success over the past 13 years has been built on our reputation, our commitment to provide an exceptional level of service, our pride in the finished product and most importantly, the quality of the relationship established and maintained with our clients in all areas of the company. In fact, most of our clients are repeat customers or were recommended through word of mouth, which is a testament to the level of quality we place on every project we take on.

Easy Living Home Elevators draws on the knowledge and expertise of our team of experienced technical sales consultants, project managers, installers, service and maintenance administrators in every phase of your lift order and installation process, ensuring you receive the highest level of service, from product specification, design information and site-specific lift drawings, through to manufacture, delivery and installation.

We also pride ourselves in treating our clients as people, rather than numbers. Like you, we enjoy the satisfaction of things running smoothly and to plan within your project. Today we are recognised as one of the most progressive and innovative lift design companies in Australia.

We are proud to offer our **DomusEvolution Lift** combining quality materials, elegant design and the flexibility to meet your every need and function.

When Quality Matters!

Quality is what makes our "DomusEvolution Lift" different from any other lift. Designed, engineered and manufactured in Italy, the DomusEvolution promises quality, reliability and safety, delivering innovative technology and **"built to last"**!

Easy Living Home Elevators are committed to offering you these stylish and comfortable

The Easy Living Home Elevators philosophy is simple:

"The things that matter to you are the things that matter to us!"

lifts, designed manufactured and installed with an attention to detail that reflects the passion and expertise of everyone on our team.

As Managing Director Robert Pizzie, says, "In the lift industry right now, there's a clear distinction between a product that's great value and one that's just plain cheap. Great value wins every time".

Made in Italy since 1966

Our manufacturer, IGV, is a well established Italian company, designing, engineering and manufacturing state-of-the-art lifts for 45 years to more than 40 countries. IGV is supported by modern production plants with the toughest lift product and safety standards in place, on par with world's best practice, held rigorously to world quality standard ISO9001. Passion, skill and engineering rigour have always been the driving principles of founder Eng. Giuseppe Volpe, which

IGV continues to fulfil. His philosophy is also the reason for the trust built up over the years with customers, with issues identified at an early stage and quick and effective action taken, ensuring the highest quality and safety standards of IGV lift products.

IGV and Easy Living Home Elevators guarantee the quality, reliability, and safety of our products.

This gives you peace of mind when making your purchase.

IGV Founder Eng. Giuseppe Volpe

“The most successful lift manufacturer in Italy selected Easy Living Home Elevators over all the others, to promote, install and maintain their lift products in Australia.”

We don't leave anything behind except the competition.

Safety is the most important aspect of our DomusEvolution Lift and by manufacturing it in Italy, to the highest quality and safety standards; we know that we are providing you a superior lift product, built to last!

Easy Living Home Elevators are committed to quality, reliability and safety.

“Product made in Italy means that you can expect a quality product that 'won't fall apart' Cheap and low quality imported

lift products from cheap labour countries often can't compete with high quality and safe lift systems manufactured in Italy”

World Class Project

Easy Living Home Elevators was selected to design, supply and install the "world class" premium DomusEvolution Lift into a prestigious penthouse unit, where attention to detail was paramount with luxurious finishes to the highest standards, combined with

a reliable European drive system featuring the latest technological advances and performance.

The premium quality finishes and fittings in this remarkable abode are further enhanced with the whisper quiet and smooth

operation DomusEvolution Lift from Easy Living Home Elevators serving all 3 levels of this significant piece of real estate.

"When quality matters, Easy Living Home Elevators is the only choice."

The Domus Evolution

It's all about choice

Every DomusEvolution Lift is custom designed to fit in any location of the home. Including the option of a self-supporting steel and glass tower which can be installed internally and externally to the home and designed to fit into small spaces as well as save money in shaft construction.

More over now you have the choice of having a Hydraulic or a Traction drive system. For a maximum energy saving and low cost maintenance.

The DomusEvolution Lift has the flexibility to satisfy the most demanding specifications to cater to specific individual needs. Available in over 30 design variations...yes over 30, and that's not a misprint!

Design Integrated

The DomusEvolution Lift is a completely integrated design using specialized lift components, not a collection of separate components bundled together under the marketing rubric "worlds best".

No Crane Required

All our DomusEvolution Lifts can be assembled through landing entrance doors, which means we don't need to crane the lift in from the top of the shaft; no hold-ups waiting for the lift to arrive, no street blockages and no crane hire costs which can run into thousands of dollars.

Class A Energy Efficiency

The DomusEvolution Lift with hydraulic drive system has been designed with optimum energy conservation features. Single phase low power consumption, reduced-start hydraulic system, 100% biodegradable green oil and auto-off LED lighting in the lift car ensures your lift has extremely low running costs.

Optional you can have the DomusEvolution Lift with traction system, an eco-friendly option with electric gearless motor technology for a power saving.

Space Saving

Our DomusEvolution Lift is extremely space saving. A low 150mm pit depth, 2650mm headroom requirement and minimal footprint dimensions mean:

- > NO wasted space.
- > NO deep excavation.
- > NO ugly shaft protruding through the roof.

Even our tiny single-phase self-contained control cabinets reduce lift area requirements, eliminating the need for a separate control room. This makes the DomusEvolution Lift very easy to accommodate into your new or existing project.

Reliability and safety

With few moving parts to wear out plus integrated emergency battery lowering system, automatic return to lowest floor feature, and full-height light ray car safety entrance protection included as standard, you have the confidence of an extremely reliable and safe drive system.

Economical Maintenance

With almost 5000 lifts in our maintenance system, we have the knowledge and expertise to offer you a tailored maintenance solution that provides you the best price while ensuring continuous reliability.

Peace of Mind

Easy Living Home Elevators only install the best quality lifts. We are so confident in the quality of our products, we offer 12 months warranty on both our residential and commercial range of lifts.

No Hidden Extra's

We at Easy Living Home Elevators pride ourselves on offering you a package with no "hidden" extras. What our competitors consider as options, we provide you as standard.

testimonial

The installation of your lift has proven extremely popular with visitors and staff many of whom are part of the aging population. Many thanks to your service technician who approached his duties in a very professional manner.

Mr. Murphy - General Manager
Narrandera Shire Council

The green solution designed with the planet in mind

The DomusEvolution Lift range has been designed with optimum energy conservation features, ensuring extremely low running costs.

- > 30amp single phase low power consumption, with energy required only to push the lift car up, thus using no more power than a small electrical appliance!
 - > Reduced power hydraulic start drive system or the optional eco-friendly traction drive system.
 - > Auto-off lighting system in the lift car.
- > Select LED downlights from our standard range of lighting, which last up to 50 times longer than halogen lighting and consume about 20% of the energy.
 - > Ability to park at last point of destination to avoid unnecessary travels and waiting times.
 - > Hydraulic system with 100% biodegradable EcoOil: This biodegradable hydraulic fluid saves energy, lowers greenhouse emissions and assures maintenance reliability, replacing traditional hydraulic fluid.

EcoOil fluid, based on synthetic saturated esters, is zinc free and derived from renewable raw materials, with additives especially selected to obtain a non-toxic biodegradable product. With higher performance than traditional fluids or other commercial biodegradable fluids, EcoOil lasts 3-4 times longer than traditional mineral oils.

Unlike conventional hydraulic lifts, the DomusEvolution Lift is cleaner and easier to maintain without compromising on quality or features.

DomusLift Range Awarded: Class A Energy Efficiency

Recently the Hydraulic Domus range of lifts was awarded an exciting "Class A energy efficiency" under the European Union energy label, bringing innovation into the home while helping to reduce the households' environmental impact. With the DomusLift tested at a standard rated load of 300kg and a nominal demand per year of 365 days of operation, the rated value is 277,08 kWh.

Safety

Advanced lift safety for peace of mind

Every DomusEvolution Lift has been developed with the paramount objective of providing users with the highest possible level of safety ensuring peace of mind.

Our standard safety features others consider optional extras, is what makes the DomusEvolution Lift different from any other lift.

- > An integrated automatic emergency lowering battery system to allow the car to lower to the lowest floor and unlock the door in the event of mains power failure.
- > Automatic return to lowest floor feature - In the event of an electrical power failure, the lift will return to the lowest floor, with all safety features in place.
- > Emergency lighting - If an electrical power failure occurs the emergency light turns on and the control or call button corresponding to the lowest level lights up.
- > Full height light ray car safety entrance protection is included as standard, to the car door openings, for total passenger protection through the lift doorway.
- > Over speed sensing safety gear.
- > Few moving parts to wear out, with very few moving parts you have the confidence of an extremely reliable and safe drive system.
- > Electrical locks that make it impossible for the lift to travel away from the landing when the landing door is not closed.
- > Mechanical locks that make it impossible for the landing door to open when the lift is not at floor level.
- > Key Switch/Lock in the Car and landing Operating Panels. To lock and unlock the lift. Access to the DomusEvolution Lift is controlled by key switch, which enables the Operating Panel to be turned ON or OFF, this limits use to authorised persons only.
- > A telephone is provided inside the lift in the event of an emergency, others can be contacted for help and the Easy Living Home Elevators 24 hour emergency service is programmed into the phone.
- > Emergency Alarm Button, located in the operating panel, it is provided to alert surrounding persons in the event of an emergency. When the emergency bell is pressed a ring will sound to alert others that attention or help is required.

Every DomusEvolution Lift is designed to comply with the requirements of the BCA & is designed to the latest Australian regulatory safety standards AS1735.18/15

testimonial

"I would like to thank Easy Living Home Elevators for the successful installation of the lift at the state athletics centre. Your team's efforts in meeting the tight timeframe has added to the success of recent events. The installation is of high quality and the National Athletics Championships were a resounding success"

Robert Baird - Government Department
Building Management and Works

It's all about the service

With every DomusEvolution Lift purchase comes a philosophy of engineering excellence, quality and advanced technology. Easy Living Home Elevators delivers the technical expertise, special diagnostic equipment and genuine parts required to keep your DomusEvolution Lift in optimum condition.

There is also an advantage knowing your DomusEvolution Lift is maintained by qualified maintenance and safety technicians, all employed and trained by Easy Living Home Elevators. What this means to you is that we have experienced, capable technicians who share our company vision for excellence in lift maintenance and customer safety.

Australia Wide Service

Easy Living Home Elevators have a network of technicians located across Australia to ensure fast guaranteed response rates arrival time to emergency calls in the residential lift market.

24/7 Call Centre Assistance

At Easy Living Home Elevators you not only get a home elevator, but a serious commitment from us, every lift installed has access to our 24 hour call centre.

Fast response rates

By using the latest technology and network of technicians located throughout Australia, Easy Living Home Elevators is able to offer the fastest guaranteed response rate to emergency calls in the residential elevator market. This service offered by Easy Living Home Elevators is second to none, providing peace of mind.

The NavMan is a natural addition to our already high level of customer service. The capability of tracking every vehicle no matter where it is means that Easy Living Home Elevators is always able to dispatch the nearest technician, providing a more coordinated and efficient response service that keeps everything running smoothly.

As soon as a customer call comes in, our service centre can instantly match the nearest and most appropriate technician to the job, and provide an estimated arrival time, providing immediate peace of mind for our customers.

Genuine parts for peace of mind.

Easy Living Home Elevators takes pride in providing high quality genuine parts to meet the highest quality expected by our customers, which have been designed specifically for your DomusEvolution Lift to ensure a perfect fit and superior performance.

All genuine parts are engineered and tested to ensure safety, reliability, durability and performance. They not only meet Australian Design Standards but also in many cases exceed them.

Self Supporting Tower Structure

The Easy Living Home Elevators tower structure is designed to impress. The DomusEvolution Lift tower is popular with architects and builders as it is very easily incorporated into new and existing projects.

Impressive features include:

- > The structure is suitable for indoor and outdoor applications
- > Available with both Hydraulic or Traction drive system
- > All components can fit through standard residential doorways
- > The tower frame and panels are typically steel, which can be primed or powder coated with over 260 colours available.
- > Panels are available in glass, in a wide range of colours and tints. The structure actually takes up significantly less floorspace than the masonry alternative. For instance each wall of a steel tower frame is only 50mm thick. (An average masonry wall is approximately 190mm thick on each side)

Bisazza Glass Mosaics

A new luxury line in collaboration with Bisazza mosaics, the Italian leading manufacturer of glass mosaics. This brand new décor concept enhances the DomusEvolution Lift design with the unusual application of glass mosaics, delivering an amazing aesthetic experience. The ultra modern, clean lines of the mosaic finish make an impressive feature in the home and a stunning work of art inside the DomusEvolution Lift.

Classic Luxury Range

The new DomusEvolution Lift Classic Luxury range was developed for those who love a warm and inviting wood grain atmosphere in their home décor. This line was designed to reproduce the effect of a classic natural wood grain finish. The result is a stunning natural look.

Light Touch Range

Recent developments in the DomusEvolution Lift range involve a new design concept that provides unconventional luxury. The stylish new DomusEvolution Lift light touch involves refined attention to detail, from the innovative colour light scheme with polychromatic neon lighting, through to the high tech designed digital touch screen control panel framed by a metallic white plaque, which can also play MP3 files or be connected to the home automation system. (Available upon request).

The future of living

Easy Living Home Elevators has grown to be the Number ONE residential lift company in Australia. With a growing demand for lifts into both residential and commercial applications, and a continuous focus on quality and service, Easy Living Home Elevators are dedicated to providing the latest and innovative lift products to the Australian market, while maintaining the traditions that has made the company what it is today.

"The number ONE lift company Australia wide"

Try before you buy

By appointment, you can inspect our lifts on display and in operation within our showrooms in Brisbane, Sydney, Melbourne, Adelaide and West Perth which have been set up solely as a way of demonstrating our high quality, quiet and beautifully finished lift systems to you. Fully qualified lift consultants are also available to discuss our range and your needs in greater detail.
