

ECOTRAQ ELEVATORS

you asked for it!

Australian Made
BCA Compliant
Machine Room Less
Low pit and headroom
Single Phase Power
Energy Efficient
Low running costs

Easy Living Home Elevators continues to lead the way in new developments. In keeping with our policy of constant innovation and improvement we set new standards and pushed the innovation of traction systems to the next level. The development of a new MRL traction elevator was a result of listening to customers needs of tightening budgets, shorter leadtimes, an eco friendly solution and fast installation timeframes.

The result is the new streamlined EcoTraq elevator which is an eco friendly MRL traction system, featuring an advanced design that delivers exceptional performance and reliability. Engineered and manufactured in Australia to the highest quality standards, incorporating state of the art technology, safety features and heavy duty construction.

With the EcoTraq range, you are not stuck with "standard" finishes and sizes, there is a vast choice of different models in the standard range including the BCA compliant size of 1100 x 1400mm, or we can offer a customised lift size to suit your application. Our lift finishes from the large standard range include our lightweight granite stone flooring selection, various types of stainless steel colours and textures, mirrors and glass turning your elevator into a remarkable designer showpiece.

designed to impress[®]

Feature Packed, what more could you ask for?

The EcoTraq elevator has all bases covered, adding convenience, value and style to both residential and commercial applications

- A smooth and quiet VVVF advanced drive system, providing excellent riding comfort
- Single phase low power consumption for environmentally friendly operation
- Low running costs
- An optional self supporting glass tower
- Single entry and through car lift arrangements
- Low pit and headroom requirements
- Maintenance-friendly
- Long life due to use of high-quality materials and a small number of wearing parts.

Energy efficiency

Every EcoTraq elevator is designed with optimum energy conservation features. Single phase low power consumption and auto-off LED lighting in the lift car ensuring your lift has extremely low running costs as well as reducing the impact on the environment.

The drive system is easy to maintain, this combined with no need for hydraulic oil that needs replacing after a number of years, low cost maintenance and minimal energy consumption, equate to extremely low running costs over the long term.

SAVING!

The EcoTraq saves in so many ways!

- A Low 250mm pit depth, 2800mm headroom requirement and minimal footprint dimensions mean:
 - NO wasted space
 - NO deep excavation
 - NO ugly shaft protruding through the roof
 - NO separate machine room required optimising building space
- Self contained control cabinets reduce the lift area requirements
- Time saving: Manufactured in Australia, for quick installation
- Energy saving with lower power consumption and lower running costs

Because it is manufactured in Australia you benefit from a fast delivery leadtime at a competitive price.

Specifications

Product	EcoTraq
Drive System	Geared Traction lift
Capacity	400kg
Speed	0.3m/sec to 1.0 m/sec**
Total Travel	12,000mm
No. of stops	Up to seven (7)
Car Size (mm)	1100 Wide x 1400 Deep Customised to suit application
Shaft Size (mm)	
Tower (single entrance)	1830W x 1870D
Tower (thru entrance)	1830W x 2050D
Internal (single entrance)	1680W x 1765D
Internal (thru entrance)	1680W x 1950D
Entrances	Single and thru car
Minimum Pit Depth (mm)	250mm
Machine Room	NOT required
Minimum Headroom (mm)	2800mm
Control Cabinet Size	445W x 220D x 2210H
Power Supply	Single Phase
Passenger Protection	Full Height Light ray
Clear door opening (mm)	900 Wide x 2000 Height

**Note: For speeds above 0.3m/sec the pit, headroom and power can vary. Please speak to Easy Living Home Elevators for more information
