# “Easy Living Home Elevators celebrates 17 years and still going strong”

Easy Living Home Elevators is Australian owned and operated. Our company has been in operation since 1998, and during this time period has grown steadily. Today in our 16th year we have over 110 employees and growing!

Easy Living Home Elevators has achieved an outstanding reputation with over 7500 lifts in our maintenance system around Australia, mostly in private residential homes.

Our success over the past 17 years has been based on our reputation and commitment to provide an exceptional level of service and pride in the finished product.

***In fact, 61% of our clients are repeat customers or are recommended through word of mouth, which is a testament to the level of quality we place on every project we undertake.***

Easy Living Home Elevators draws on the knowledge of our experienced team. We pride ourselves in treating our clients as people, rather than numbers. Like you, we enjoy the satisfaction of things running smoothly and to plan within your project. We are recognised as one of the most progressive and innovative design lift companies in Australia.

Easy Living Home Elevators has the flexibility to meet all your structural, design and budgetary requirements.

We are proud to offer our extensive DomusLift range to suit your application and style, involving quality materials and prestigious lift designs to meet your every need and function.

The Easy Living Home Elevators philosophy is simple:

**"The things that matter to you are the things that matter to us!"**

*Luxury*

# When Quality Matters!

Quality is what makes our “DomusLift” stand out from other types of home lifts in the market today. This world-leading equipment has been designed, engineered and manufactured in Italy. It has been specifically “built to last” and to date, it continues to deliver its promise of quality, reliability and safety, along with the latest in cutting-edge technology.

It’s designed around the requirements of a residential property, maximising the usable space within your home. This combined with low maintenance and running costs, makes the DomusLift the most bought home elevator in Australia.

***"We at Easy Living Home Elevators pride ourselves on providing the best quality and the best value. In the lift industry right now, there's a clear distinction between a product that's great value and one that's just plain cheap. Great value wins every time"***

Mr Robert Pizzie  
Managing Director

# The DOMUSLIFT *Difference*

## ***Customised to suit your home***

Every DomusLift is custom-built and designed to fit almost anywhere within your home, both indoors and outdoors with minimum architectural impact and builder's works.

Available in over 90 design variations, make yours a focal point in a self-supporting glass shaft structure or incorporate it into the overall design of your home, into an existing or pre-built shaft.

## ***No Crane Required***

All our DomusLifts can be carried through landing entrance doors which means we don't need to crane the lift in from the top of the shaft.

No hold ups waiting for the lift to arrive, No street blockages and No crane hire costs which can run into thousands of dollars.

## ***The world leading DomusLift is built to last!***

Its design integrated and the most bought home elevator in Australia. The most amazing statistic is that there are over 30,000 DomusLifts installed in over 40 countries in the world market – and growing! You can be assured of the quality, reliability and back-up.

***“30,000 DomusLift owners  
world wide can't be wrong”***

**30,000  
DOMUSLIFTS  
SOLD WORLDWIDE**

### ***Peace of Mind***

Easy Living Home Elevators only install the best quality lifts. We are so confident on the quality of our products, we are actually first lift company in Australia to offer 3 year warranties on residential lifts.

### ***Space Saving***

Our DomusLift is extremely space saving. A low 130mm pit depth, 2450mm headroom requirement and minimal footprint dimensions mean:

- > NO wasted space.
- > NO deep excavation.
- > NO ugly shaft protruding through the roof.

Even our tiny single phase self contained control cabinets reduce the lift area requirements, maximising the usable space within your home

### ***Whisper Quiet***

The DomusLift range provides safe, ultra smooth and whisper quiet drive systems. We invite you to come and visit our showrooms with operational lifts on display, and put us on to the test.

**We have probably installed  
a DomusLift in your street  
or your neighbours home**

# EAGLEOS®

THE BEST JUST GOT BETTER

## THE EAGLEOS SMART LIFT HAS LANDED

Combining sophisticated technology and innovative features, there is no other home elevator on the market like the DomusLift range.

### EagleOS ALWAYS WITH YOU

- Iphone connectivity
- Remote control of your lift
- Remote monitoring
- Music streaming
- Monitor performance
- Security: ability to lock off a particular floor
- Park at predetermined landing when it is not in use
- Remote fault diagnosis
- Buttons in lift car and at landings light up and more.....

### Excellence to a whole new level

The EagleOS is revolutionary, our highly skilled engineers can monitor your elevator, maximising its performance, quickly & effectively, at the same time reducing costs by minimising the need to send our technicians to your home.

**“The EagleOS brings  
big lift technology  
into the home”**

# Italian Quality since 1966

The DomusLift is proudly designed, developed and manufactured in Italy. Safety is the most important aspect of our DomusLift and by manufacturing it in Italy, to the highest quality and safety standards; we know that we are providing you a superior lift product, built to last!

Unfortunately in recent years we have experienced growing concerns with the quality of imported elevators from some parts of the world, being rushed onto the market with very poor standards in quality control and safety.

A major fundamental problem is that these new lift manufacturers concentrate on superficial appearance, using

granite, glass or stainless steel. Yet the workmanship beneath is inferior, where after installation the lift corrodes or falls apart. These manufacturers don't believe in producing a high quality lift product for long term performance, costing you more time and money.

We don't leave anything behind except the competition.

# Luxury

# Green Solutions

## Designed with the planet in mind

The DomusLift range has been designed with optimum energy conservation features, ensuring extremely low running costs.

- > 25amp single phase low power consumption, with the only energy required to push the lift car up, thus only using the same power as a small electrical appliance!

- > Reduced power start hydraulic system

- > Auto-off lighting system in the lift car, which is a car light timer to automatically switch the car light off after use to save power consumption.

- > LED downlights from our standard range of lighting, last up to 50 times longer than halogen lighting and consume about 20% of the energy.

- > Ability to park at last point of destination to avoid unnecessary travels and waiting times.

- > Optional 100% biodegradable EcoOil: This biodegradable hydraulic fluid saves energy, lowers greenhouse emissions and assures maintenance reliability, easily replacing the traditional hydraulic fluid.

**DOMUSLIFT**

# Safety

## Advanced lift safety for peace of mind

The DomusLift range has been developed with the paramount objective of providing users with the highest possible level of safety ensuring peace of mind.

Our standard safety features others consider optional extras, is what makes the DomusLift different from any other lift.

- > Integrated automatic emergency lowering battery system to allow the car to lower to the lowest floor and unlock the door in the event of mains power failure.

- > Emergency lighting - If an electrical power failure occurs the emergency light turns on and the control or call button corresponding to the lowest level lights up.
- > Full height light ray car safety entrance protection to the car door openings, for total passenger protection through the lift doorway.
- > Over speed sensing safety gear.

- > Few moving parts to wear out, with very few moving parts you have the confidence of an extremely reliable and safe drive system.

- > Electrical locks that make it impossible for the lift to travel away from the landing when the landing door is not closed.

- > Mechanical locks that make it impossible for the landing door to open when the lift is not at floor level.

- > A telephone is provided inside the lift in the event of an emergency, others can be contacted for help and the Easy Living Home Elevators 24 hour emergency service is programmed into the phone.

- > Emergency Alarm Button, located in the operating panel, it is provided to alert surrounding persons in the event of an emergency.

# Service

## It's all about the service

With every DomusLift purchase comes a philosophy of engineering excellence, quality and advanced technology. With over 7500 elevators in our maintenance system, we have the technical expertise, special diagnostic equipment and genuine parts required to keep your DomusLift in optimum condition.

There is also an advantage knowing your DomusLift is maintained by qualified maintenance and safety technicians, all employed and trained by Easy Living Home Elevators.

### **Australia Wide Service**

Easy Living Home Elevators have a network of technicians located across Australia to ensure fast guaranteed response rates arrival time to emergency calls in the residential lift market.

### **24/7 Call Centre Assistance**

At Easy Living Home Elevators you not only get a home elevator, but a serious commitment from us, every lift installed has access to our 24 hour call centre.

### **Fast response rates**

#### *We are just around the corner*

By using the latest technology and network of technicians located throughout Australia, Easy Living Home Elevators is able to offer the fastest guaranteed response rate to emergency calls in the residential elevator market.

### **Genuine parts for peace of mind.**

Easy Living Home Elevators takes pride in providing high quality genuine parts to meet the highest quality expected by our customers, which have been designed specifically for your DomusLift to ensure a perfect fit and superior performance.

## Leading the way in Glass Shaft Technology

Easy Living Home Elevators leads the market with over 1200 glass shafts installed around Australia.

### Performance

- > Made in Italy....built to last!

### Architectural Feature

- > A visual high end architectural design, used to create a dramatic effect.
- > Provides views, natural light and a sense of spaciousness.
- > The tower frame is typically anodized aluminium or steel, which can be powder coated in over 260 colours.
- > Panels are available in glass, in a wide range of tints.

### Design freedom

- > Overcome site limitations including views or the presence of a neighbouring building.
- > Greater design flexibility bringing out the best in projects from contemporary to classic, the newly built or renovated
- > Optimum utilisation of floor area, creating valuable use of what may otherwise be dead space.
- > Takes up less floor space than the masonry alternative. Each wall of an aluminium tower frame is only 50mm thick compared to the average masonry wall which is approximately 190mm thick on each side.

**“An average overall cost saving of about 25% is achieved when compared to using the masonry alternative”**

### The More Powerful DomusXL Lift, Designed for Optimum Performance

The more powerful DomusXL Lift is a popular model, measuring 1100x1400mm (internal car size) and equipped with swing landing doors, it is an exceptionally spacious home lift with a lifting capacity of 400kg.

What sets the DomusXL Lift apart is its cutting-edge 2 speed drive system which is extremely energy efficient, operates almost silently and gives passengers a comfortable, smooth ride.

#### Customised to Suit your Home

All models are custom designed to fit in any location of the home, both indoors & outdoors and with minimal architectural impact and builder's works.

Opt for a specially designed structural self supporting steel and glass tower, allowing the elevator to fit into small spaces. The DomusXL Lift is extremely versatile and has the flexibility to meet even the most demanding specifications, allowing it to cater to every individual need.

# Designer Collection

## Frameless Glass Doors

Easy Living Home Elevators raises the bar again introducing the ultra modern, sleek, clean line look, frameless glass swing door system which turns the elevator into a remarkable designer showpiece.

Whisper quiet and smooth in operation with a focus on strength and style, the “V1 Glass Doors” features the same European design and precision engineering you have come to expect from Easy Living Home Elevators, featuring only the best materials to the highest standards.

The “V1 glass doors”, appeals to designers and architects who value high quality lift solutions, with a focus on design to fully exploit the visual effect of glass and do justice to the elegance and transparency of the modern home.

## DomusLift Bisazza Glass Mosaics

A luxury line in collaboration with Bisazza mosaics, the Italian leading manufacturer of glass mosaics.

Offers an amazing aesthetical experience décor concept enhancing the DomusLift design by featuring the unusual application of glass mosaics.

This ultra modern, sleek, clean line look is designed to create an impressive feature within the home and will make a dramatic statement and a stunning work of art inside the DomusLift.

## DomusLift Classic Luxury Range

The DomusLift Classic Luxury range was developed for those who love the warm and inviting wood grain atmosphere within their home décor.

This line was developed and designed to reproduce the effect of a classic and natural wood grain finish. The result is a stunning and amazing natural look.

Easy Living Home  
Elevators have once  
again proved they  
are the leaders in the  
market when it comes to

# Product innovation

# Liberty appeal

by  trend  
trend-group.com

The Liberty designer collection, of glass mosaics are carefully handcrafted.

Cut in a repetitive, irregular mode to further enhance lighting effects within the lift car.

Each surface is characterised by incorporating different sized tiles of the same contrasting shades or even different tones. Creating a premium and unique finish.
