

EASY LIVING
**AN ELEVATED
EXPERIENCE**

BE INSPIRED | AVANTI LIFT

EASILY ACCESS YOUR HOME WITH A FULLY AUTOMATED HOME ELEVATOR

This contemporary residence is set on a steep block of land which rises to superlative views over the harbour. When designing the home, architects utilised an articulated building form to follow as closely as possible the contours of site.

Holding tightly to the hillside, the home design was spread over four levels with vehicular access from the highest level, thus requiring a FAST elevator to transport the home owners from floor to floor.

“

*We love our new home and the FAST Avanti lift.....
it's fantastic and makes life so much easier.*

QUICK, FIRST-CLASS TRAVEL EXPERIENCE

“The building interior should form a backdrop to the views of the harbour,” explains the architect, Mr Wakerman. “The large areas of frameless glass provide a lens.”

To ideally orient living areas toward the views, the design was spread over four levels with vehicular access from the highest level and living areas located at the lowest level. The owners wanted a FAST elevator to transport them from floor to floor, at 1m/sec the Avanti Lift is exceptional, traveling at a speed 3x faster than your average home elevator (at 0.3 meters per second), ensuring a quick, first-class travel experience.

AVANTI LIFT

The AVANTI Lift takes performance, cutting-edge technologies, quality workmanship and top class European materials that sets it apart.

FAST performance at speeds of up to one meter per second, 3x FASTER than a standard home elevator (at 0.3 meters per second) is exceptional.

REFLECTING THE INTERIOR DETAILING

Easy movement between these levels was devised by the architects in association with Easy Living Home Elevators. From the highest level, a fully automated lift provides vertical access from the garage to the kitchen, pool and living areas located at the lowest level. The elevator design reflects the interior detailing found throughout the home, with stainless steel doors, mirrored and stainless walls and careful stone finishing. Once downstairs, a large open-plan living area leads out through frameless glass folding doors to a generous terrace bordered

by a swimming pool. The pool in turn forms the horizon line to the waters on the harbour. A smart system, which controls everything from lighting to security and audio/visual, operates the home.
