AVANTI LIFT

The AVANTI Lift takes performance, cutting-edge technologies, quality workmanship and top class European materials that sets it apart.

FAST performance at speeds of up to one meter per second, 3x FASTER than a standard home elevator (at 0.3 meters per second) is exceptional.

AN AVANTI LIFT CONNECTS ALL THREE LEVELS

The fit-out at Maroondah Hwy, Ringwood is a modern office and workspace environment that places the health and wellbeing of employees front of mind. Easy movement between these levels was devised by the architects in association with Easy Living Home Elevators. From the lowest level a generous reception area welcomes visitors, while a fully automated AVANTI lift contained in a self supporting glass tower provides vertical access connecting all three levels.

The dramatic glass tower structure anchors the fit-out, while a staircase wraps around it, visually connecting each area.

"Since 1964 our factory Orona have been producing high quailty and high speed lifts with 1 in every 20 lifts in the world an Orona lift"

PERSONALISE YOUR PROJECT

The AVANTI lift design consists of a minimalistic neutral colour palette with stainless steel doors, brushed stainless walls and careful tile finishing, which reflects the buildings interior detailing with a sense of cohesion. Keeping the space feeling open and welcoming without feeling vacuous or intimidating.

Easy Living Home Elevators can help you realise your dreams for your boutique commercial space. Customisable options ensure that your unique project will be a success and our personalised service guarantees satisfaction.
